

COVID-19 Enhanced Surface Cleaning and Disinfection

During the COVID-19 pandemic, enhanced cleaning and disinfection should be used on worksites to reduce the risk of transmission.

NOTE: In the event a confirmed case of COVID-19 was present on site, a specialized biohazard remediation, abatement company should be contacted for professional disinfection.

Clean and disinfect all frequently touched surfaces. This includes but is not limited to:

- table tops
- control panels
- computer/keyboard/mouse
- door knobs
- light switches
- handles
- bathrooms
- steering wheels
- eating areas
- pens
- hoist gates
- stair and equipment railings
- first aid equipment

Cleaning and disinfection should be done as often as possible and at a minimum at the beginning and end of shift, before eating and between crew changes.

Avoid sharing tools and pens; disinfect before sharing.

CLEANING: Removes visible soiling (e.g., dust, soil); does not kill viruses and bacteria. It is done with water, detergents and steady friction from cleaning cloth.

DISINFECTING: Kills viruses and bacteria. A disinfectant is only applied to objects, never on the human body. All visibly soiled surfaces should be cleaned before disinfection.

Most cleaning can be done using regular housekeeping best practices.

WHAT PRODUCTS SHOULD BE USED FOR DISINFECTION:

- Household or commercial disinfection products (follow manufacturer's instructions), or a bleach solution (1 part bleach and 9 parts water).
- Do not mix bleach with ammonia or any other cleaning product.

DURING CLEANING/DISINFECTION

- If the surface is dirty remove visible dust and debris and clean using detergent or soap prior to disinfection.
- Follow disinfection product manufacturer's instructions.
- Wear nitrile or neoprene gloves while working with disinfectant products.

AFTER CLEANING/DISINFECTION

- Wash hands with soap and water using proper handwashing procedures immediately after gloves are removed.
- All disposable materials must be placed into a leak proof garbage bag and sealed for disposal.

HOUSEKEEPING

- Regular housekeeping practices should be maintained in addition to enhanced surface cleaning/disinfection.
